This Action is responsive to the communication filed January 11, 2007.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1-6 and 10-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Davis in view of Taylor et al and further in view of Newman et al.

Davis shows an absorption refrigeration system where the heat supply is regulated by interconnected valves 30, 31, but they are in a Y housing and use a pneumatic actuator. Taylor et al show a three way valve which can be in a T or a Y housing. It would have been obvious at the time the invention was made for one of ordinary skill in the art to have used such a T housing as taught by Taylor et al in place of the Y housing of Davis in view of the equivalence taught by Taylor et al. Taylor et teach an electric motor to actuate the valve and provides for modulating the valves to regulate flow. Newman et al show a similar refrigeration system where heat supply is regulated by a bypass valve 42 which may be varied to control the refrigeration process. It would have been obvious at the time the invention was made to have used an electric motor as taught by Taylor et al in the apparatus of Davis to provide actuation of the valve and to variably control the Davis valves to regulate the refrigeration process as taught by Newman et al.

The use of a computer to control the system is seen to be an obvious expedient in view of the state of the control systems art, and the use of a sink such as to recover heat from the system is considered to be an obvious step in view of the recognized desirability of energy efficiency.

Claims 7-9 are allowed.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
